

GALVANIZED STEEL WIRE FOR CABLE

Construction :

Application :

Generally used for construction/reinforcement of conductors for overhead power transmission purpose.
Mainly used for NFA2X-T and MVTIC Cable

Technical Data :

Standard : According to SPLN D3.010 - 1,
IEC 60888

Special Features Upon Request

Nominal Diameter of Wire	Tolerance on Wire Diameter	Minimum Stress at 1% Extension	Minimum Ultimate Tensile Strength	Minimum Elongation in 250 mm	Mandrell Diameter for Wrapping Test	Minimum Weight of Zinc Coating
mm	mm	MPa	MPa	%	X x OD	g/ m ²
2.73	±0.04	1140	1310	3.0	1	230
3.26	±0.05	1100	1290	3.5	1	245
3.85	±0.06	1100	1290	4.0	1	260
